*ZENER VOLTAGE REGULATION FACTOR: The Zener Voltage shall be measured at 10% of the I_{ZM} (Maximum DC Current). The current shall then be increased to 50% of the I_{ZM} and maintained at this level for a period of 90 seconds, at which time the change in Zener Voltage ($|V_Z @ 10\%| - |V_Z @ 50\%|$) shall not exceed the Zener Voltage Regulation Factor. The device is to be suspended by its leads 3/8" from the body in free air at 25°C .
